

Internal & Supply Chain Aerospace Auditor

In partnership JPD Training and Acorn Management Solutions offer a two-day course for internal auditors

What you will learn

At the end of this practical course, delegates will be able to:

- Describe the responsibilities of internal auditors, and their role in maintaining and improving management systems and helping manage suppliers through value adding audits
- Explain the purpose and structure of AS 9100
- Plan and prepare for an internal audit Plan and prepare for a supplier audit
- Gather objective evidence through observation, interview and sampling of documents and records
- Write factual audit reports that help to improve the effectiveness of the management system
- Suggest ways in which the effectiveness of corrective action might be verified

The course

- Concepts of auditing
- An overview of AS/EN/JISQ AS 9100
- The human aspects of auditing
- Performing an audit
- Planning and preparing for an audit, including audit objectives
- Reporting findings, raising nonconformities
- Identifying improvement opportunities
- Follow up action
- A case study enables delegates to participate in group exercises and gain practical experience of all aspects of the internal audit process.

This course can be also taken over 3 days which will look at the aerospace context and supply chain auditing in more depth. It can also be presented on site using company documentation and embrace current organisational issues.

Who should attend?

- Managers and staff who are, or about to become, members of the organisation's audit team. AS 9100 and key customers requires that staff are trained and competent
- Anyone wishing to achieve a recognised competence in internal quality auditing.
