

ISO/TS16949: Internal Auditing

A two-day workshop on how to audit to ISO/TS16949

What you will learn

This practical course will provide:

- An overview of how ISO/TS16949 differs from ISO9001 and QS-9000. Throughout the course we emphasise how ISO/TS16949 differs from ISO9001 and QS-9000 in its expectations of auditors
- Refresher training in the practice of internal quality systems auditing as a method of management control in the context of ISO/TS16949

The course

- Introduction and background to ISO/TS16949:2002
- The automotive process approach to auditing
- ISO/TS16949:2002 and customer specific requirements
- The core tools: APQP, SPC, MSA, FMEA
- Internal auditor qualification and evaluation
- Planning, conducting, reporting and closing out the findings from internal audits

“Very helpful for auditing to TS16949. The knowledge and enthusiasm of the presenter were much appreciated.”

*Anand Dayal, Graduate Project Engineer,
Trelleborg Industrial AVS*

Who should attend?

- Managers and staff who are, or about to become, members of the organisation's audit team. ISO/TS16949 requires that staff are trained and competent
- Key personnel from those organisations that are currently preparing for assessment to ISO/TS16949

Next steps...

- FMEA
- APQP-PPAP
- Root Cause Analysis
- Measurement System Analysis
- Statistical Process Control
