

BS8555/Acorn Scheme

A one-day course on the phased introduction of EMS

What you will learn

The course provides:

- A review of the BS8555 standard and the concept of phased EMS implementation
- A description of the Project Acorn scheme
- An explanation of the environmental aspects of businesses
- Guidance on the selection and use of environmental performance indicators
- An explanation of the audit and inspection requirements of BS8555 and the Acorn scheme
- A description of third-party assessment methodology for BS8555/Acorn
- Recommendations for further development towards full ISO14001/EMAS implementation

Introduction to IPPC

A one-day course on Integrated Pollution Prevention (IPPC) Regs

What you will learn

For operations that already have, or that need to apply for, a Permit to operate under IPPC, there is a statutory duty to understand the issues. Permits issued under IPPC include requirements for staff to be suitably trained and conversant with the requirements of the Permit. The course enables delegates to understand:

- The legal background of IPPC
- The concepts of Integrated Pollution Prevention and Control
- To understand the definition of Best Available Techniques (BAT)
- The structure of the Pollution Prevention and Control (PPC) Regulations 2000

We understand your needs and provide training and development programmes that bring immediate returns

Who should attend?

- Senior managers needing an overview of requirements for phasing in an EMS
- Environmental, health & safety and quality staff with direct responsibility for setting up and maintaining an EMS
- Auditors who need an appreciation of the specific audit and inspection requirements of the BS8555/Acorn scheme

Who should attend?

- The structure of the Pollution Prevention and Control (PPC) Regulations 2000
- Managers who need a practical understanding of the PPC Regulations
- Those appointed to prepare and submit an IPPC Permit Application
- Staff responsible for ensuring ongoing compliance with Permit conditions
- Pollution control specialists who need an understanding of IPPC requirements
- Environmental consultants wishing to provide IPPC support to clients
