

EMS Internal Auditor

A practical and interactive two-day course

What you will learn

The course will explain:

- Principles and objectives of environmental auditing
- The internal audit compliance requirements of ISO14001
- Key points an Internal Auditor should look out for
- How to plan and prepare for an audit
- How to carry out effective audits and report their findings

The course

- An overview of environmental management and ISO 14001
- Environmental reviews against legislation and/or standards including ISO 14001
- Planning and preparing for an audit
- Performing effective audits
- Reviewing and reporting audit findings
- Raising non-conformities
- Report writing
- Effective follow-up and close out of non-conformities

Whether you are in the manufacturing or service sector, we understand your needs

Who should attend?

- Environmental, health and safety and quality managers.
- Anyone who will be required to perform internal audits of their environmental management system. It is preferable if delegates have some knowledge of ISO 14001 or their own environmental system prior to attending the course.

Next steps...

- IEMA Foundation Auditor
- The New Environmental Manager
