

The New Environmental Manager

A two-day workshop providing the tools of environmental systems management

What you will learn

The workshop will:

- Provide a background in environmental management
- Explain the role of the environmental manager
- Describe the environmental pressures on businesses, including the importance of UK/EU legislation and stakeholder concerns
- Introduce basic tools
- Provide ideas for future improvement activities

The course

- What is "the environment"?
- Environmental legislation
- Environmental management
- Workshop on environmental performance improvement
- Syndicate exercises on environmental auditing

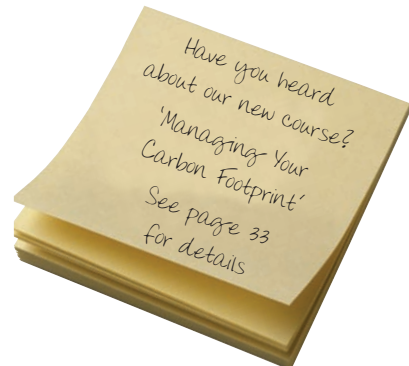

"The course was highly relevant and well presented. I have recommended it to other managers."

*Warrick J Codling, Team Leader
Hepworth Concrete*

Who should attend?

- Newly appointed environmental managers (or those who aspire to be) who have little formal training in the environmental aspects of business
- Anyone wishing to make their environmental systems more effective and improve their company's level of legal compliance
