

Introduction to IPPC

A one-day course on Integrated Pollution Prevention (IPPC) and the Pollution Prevention & Control Regs 2000

What you will learn

For operations that already have, or that need to apply for, a Permit to operate under IPPC, there is a statutory duty to understand the issues. Permits issued under IPPC include requirements for staff to be suitably trained and conversant with the requirements of the Permit. The course enables delegates to understand:

- The legal background of IPPC
- The concepts of Integrated Pollution Prevention and Control
- To understand the definition of Best Available Techniques (BAT)
- The structure of the Pollution Prevention and Control (PPC) Regulations 2000

The course

- Definition of an IPPC installation and scope of the PPC Regulations
- Components for IPPC installations and costs of regulation
- Application requirements
- Relevance of BAT to processes or activities
- Drawing up an IPPC improvement programme
- Timescale of the IPPC process
- Requirements of IPPC for Environmental Management Systems
- Preparing a conceptual model for land and ground water contamination on site
- A logical and systematic approach to the IPPC permit

We understand your needs and provide training and development programmes that bring immediate returns

Who should attend?

- Managers who need a practical understanding of the PPC Regulations
- Those appointed to prepare and submit an IPPC Permit Application
- Staff responsible for ensuring ongoing compliance with Permit conditions
- Pollution control specialists who need an understanding of IPPC requirements
- Environmental consultants wishing to provide IPPC support to clients

This course will be tailored to meet the specific requirements relevant to the PPC Permit for your organisation, and can be held on your premises or at one of our nationwide training centres

Available as an in-house presentation only
