

Internal OHSAS 18001 MS Auditor

A comprehensive three-day course on auditing your OHSAS 18001 management system

What you will learn

Successful participants will be able to:

- Understand the requirements of OHSAS 18001
- Plan, prepare, perform and report an internal audit
- Evaluate legal compliance

The course

- Scope and objectives
- Requirements and process of MS certification
- Risk assessment
- Current safety legislation
- Implementation and integration
- Differences and similarities between OHSAS and other management systems
- Principles of health and safety management
- Roles and responsibilities
- How to collect, analyse and report findings

"You made a potentially boring subject very bouncy and captured the imagination of the delegates."

*Paul Saunders,
Quality Manager, Ansell UK*

Who should attend?

- Supervisors and managers responsible and liable for occupational health and safety management
- New and potential OHS Internal Auditors
- Consultants advising on the implementation of OHSAS 18001
