

OHSAS 18001 Implementation

A practical two-day workshop for those responsible for OH&S

What you will learn

This workshop will provide:

- Up to date and current thinking on Occupational Health & Safety
- The management systems framework defined in OHSAS 18001
- A comparison with other internationally recognised management systems
- An understanding of continual improvement of OH&S performance linked to third party certification

The course

- Overview of OHSAS 18001
- Similarities between OHSAS 18001, ISO 9001 and ISO 14001
- Health & safety policy
- Risk assessment and management
- Planning and implementation
- Checking, corrective action and management review
- Continual improvement of OH&S performance and management system certification

OHSAS 18001 helps minimise risk, improves an existing OH&S management system, demonstrates diligence, gains assurance..... the benefits can be substantial

Who should attend?

- Anyone with direct responsibility for Occupational Health & Safety
- Health & safety officers, supervisors and managers
- Those involved in internal auditing or system implementation
- Delegates should have a working knowledge of current legislation
