

# OH&S MS Auditor Conversion

**A three-day IRCA certified course for existing IRCA auditors/lead auditors**

## What you will learn

Successful participants will be able to:

- Understand the scope and requirements of the OH&S standards
- Understand the techniques available for risk assessment
- Compare the OH&S standards with the ISO standards for quality and environment
- Describe the role of auditors and lead auditors in OH&S audits
- Explain the rationale supporting the implementation of OH&S systems
- Plan, prepare, perform and report an audit
- Collect and analyse objective evidence and communicate the significance of observations made

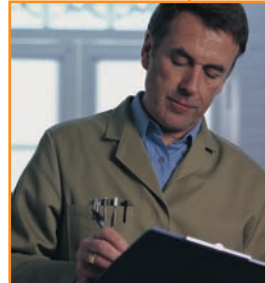

## The course

- OH&S awareness
- Legislation
- OH&SMS
- Management practices
- Auditing techniques
- Examination

The course is run in association with SEQM Ltd. It is highly practical in nature and includes role-play, seminars, exercises and presentations.

*“Good insight into all aspects of health and safety relevant to my role”*

*Paul Adams,  
Quality and Compliance Manager  
Watt Energy Ltd*

## Who should attend?

- The course is essential for anyone responsible for auditing occupational health and safety compliance, and provides knowledge of OHSAS18001 and legislative compliance issues
- Any IRCA registered auditor/lead auditor seeking registration under the OH&S MS Auditor scheme

All delegates receive a certificate verifying completion of the course. Those who pass both the practical assessment and written exam will receive a certificate of training recognised by IRCA.
