

OH&S Auditing Principles

A five-day IRCA certified course on auditing principles and OHSAS 18001 systems auditing

What you will learn

Successful participants will be able to:

- Understand the scope and requirements of the OH&S standards
- Understand the techniques available for risk assessment
- Compare the OH&S standards with the ISO standards for quality and environment
- Understand the role of auditors and lead auditors in OH&S audits
- Explain the rationale supporting the implementation of OH&S systems
- Plan, prepare, perform and report an audit
- Collect and analyse objective evidence and communicate the significance of observations made

The course

- OH&S awareness and legislation
- Management systems
- Management practices
- Auditing techniques
- Site visit
- Examination

The course is run in association with SEQM Ltd. It is highly practical in nature and includes role-play, seminars, exercises, presentations and a half-day site audit.

Our dedicated Customer Relationship Managers will assist you every step of the way

Who should attend?

- The course is essential for anyone responsible for auditing occupational health and safety compliance, and provides knowledge of OHSAS18001 and legislative compliance issues
- Anyone seeking registration under the IRCA Auditor Registration scheme

All delegates receive a certificate verifying completion of the course. Those who pass both the practical assessment and written exam will receive a certificate of training recognised by IRCA.
