

IOSH Safety for Senior Executives

A one-day workshop aimed exclusively at senior executives

What you will learn

The workshop is designed to provide an outline and introduction to safety management aimed at senior executives and includes:

- Safety management as a main line function
- Financial implications
- Responsibilities in terms of civil and criminal law and penalties should offences occur
- Structure and organisation
- Risk management
- Documentation and procedures
- Safety training
- Safety culture
- Safety roles and functions

The course

- Why manage health and safety
- HSG65 - a management model
- Introduction to legislation
- Civil law - claims and defences
- Criminal law and individual responsibilities
- Health and safety policies
- Risk assessment - an overview
- Monitoring performance
- Training
- Human factors
- Role of the senior executive

IOSH is the leading body for safety professionals, maintaining standards and providing authoritative guidance on health & safety issues

Who should attend?

Directors and senior managers who need to appreciate:

- Their health and safety responsibilities
- The financial implications of accidents and ill health caused by working conditions
- Management of health and safety is a main line function and can be managed in a similar way to other management functions
- The senior executive's role in the development of a safety culture

Certification

The course is run in association with CHSS Ltd and leads to the award of a certificate by the Institution of Occupational Safety and Health.
