

Integrated Internal Auditing

A comprehensive three-day course showing how to carry out integrated internal audits

What you will learn

This practical course will develop the skills of existing quality, environmental and occupational health and safety auditors for IMS auditing. It will:

- Raise awareness of the IMS amongst auditors
- Explain how the IMS will change the internal audit process
- Equip all auditors in the essentials of integrated audits and show how to carry them out
- Train quality auditors on OSHE requirements
- Train OSHE auditors on quality requirements

The course

- Auditing and integration, environment and OHSM
- Quality management, risk assessment
- Policy and continual improvement
- Legal compliance
- Management manual, GMP
- Process management, audit process
- Planning roles and responsibilities
- Interviewing techniques
- Working papers, findings evaluation
- Reporting and follow-up
- Site visit
- Non-conformance preparation
- Closing meeting

“Very good. Covered all the core subjects professionally.

Delivered in a unique setting.”

*Selwyn Rose, Quality Manager,
Hallmark Cards*
