

ISO 27001:2006 Implementation

Three Day Information Security Management Training Course

An Information Security Management System (ISMS) is a managed and controlled approach to protecting company information so that it remains secure, accurate and available. The course encompasses all major components of an ISMS.

The objective of this course is to provide delegates with the necessary skills to implement an ISMS that is compliant with the certification requirements of ISO 27001: 2005 and practical assistance for all other areas of the organisation.

Delegates learn about:

- Information security
- Implementing a Strategy
- The implications of implementing ISO 27001:2006 into an organisation
- Ensuring Success of ISM
- Practical Pitfalls and Obstacles
- Certification Process

Benefits to Your Business:

- Effective information security management throughout the organisation
- Cost Benefit Analysis
- Business Needs: Commercial and legal implications
- Understanding Compliance Requirements
- Reduced Operational Risk
